## Project Engineer – Variable Speed Drives

### Description

For one of its clients – a leading international manufacturer of electrical products and provider of associated services – Artemys is searching for a **Project Engineer – Variable Speed Drives** (Frequentieregelaars / Régulateurs de fréquence), who will be in charge of the engineering and technical aspects of the Variable Speed Drives projects, as well as for assuring the quality and accuracy of every project from the design phase to its conclusion.

**Location:** Brussels; Flemish Region

### Responsibilities

As a **Project Engineer – Variable Speed Drives (Frequentieregelaars / Régulateurs de fréquence)**, you will be part of a large industrial business unit, and your clients will be entities operating in Belgium and the Netherlands that need complex solutions for the control of electric motors, both pre-engineered and custom-made, for their complex industrial processes, machines, and buildings. Your key roles and responsibilities will be as follows:

### Engineering:

- Provide sophisticated technical solutions in the field of industrial automation and VSD technology (Variable Speed Drives – LV and MV drives, compact drives, process drives, etc.) to both existing and new clients
- Attend client meetings together with sales engineers, understand the client's requirements and needs, and provide detailed explanations about your technical solutions, products, and services
- Prepare technical offers and quotations
- Monitor the project life cycle of each VSD project, from start to finish, including project design development, forecasting, planning of resources, coordination of technical activities, troubleshooting, and monitoring project implementation
- Monitor compliance with relevant technical rules and regulations, ensure the accuracy and quality of work, and high level of client satisfaction
- Learn proactively about the VSD range of products and technology, including consulting the relevant technical documentation
- Cooperate closely with, and provide technical support and assistance to all project team members and clients – share the know-how about the products, services, software, etc. that will be used in projects

### Product specialist:

- Provide clients with a detailed technical explanation of VSD products, their characteristics and performance, and their application and integration possibilities
- Provide relevant technical support to your clients – be prepared to answer any questions they may have (about products, services, contract details, service contracts, spare parts, warranty, etc.), via phone or email, making sure that you prioritise client support and service needs; in addition, provide your clients with accurate and timely feedback

### Employment Type

Full-time

### Duration of employment

Undetermined

### Industry

Energy and automation

### Job Location

Brussels , Flemish Brabant

### Date posted

12 June 2022

### Valid through

20.07.2022

## **Administration**

- Manage efficiently your agenda, multitask – coordinate multiple client queries at a time, and prioritise
- Make sure that all client queries, questions, requests, RFP, issues, etc. are duly recorded in internal systems
- Regularly perform project follow-up and other relevant administrative tasks as required

## **Marketing**

- Participate in sales and promotion activities, and organise and deliver workshops and training sessions to internal and external stakeholders as required

## **Qualifications**

### **Technical skills and experience:**

- A relevant technical degree in industrial electromechanics (pref. engineer)
- Fluency in Dutch or French + good knowledge of English
- Experience in similar roles and technical knowledge in the field of automation and variable speed drives
- Proficiency in Microsoft Office suite, especially Outlook
- Ability to develop a deep and analytical understanding of clients' business and needs

### **Other competencies and qualities:**

- Strong communication skills, over the phone/in-person/in writing, at all levels
- Strong problem-solving skills
- Well-structured approach to work and good organisational skills, especially the ability to prioritise and multitask efficiently
- Ability to work independently and as part of a team
- Entrepreneurial and flexible person with a positive attitude
- Proactive, responsible, and open-minded personality
- Willingness to travel to the Netherlands, and to make site visits once or twice a month
- Intense focus on your personal and professional development – technically curious person and a proactive and fast learner with a willingness to find your own path of learning

## **Job Benefits**

- A full-time employment contract
- A full and competitive compensation package with a wide range of advantages: attractive fixed salary, annual bonus, group and hospitalisation insurances, company car, monthly fixed expenses, meal vouchers...
- Flexible home working option
- Continuous technical help and support from your colleagues, technical specialists
- Continuous learning and development opportunities (access to internal L&D programmes, learning on the spot, training sessions) and access to the internal mobility program
