Project Manager – Large Battery Projects [CLOSED]

Description

For one of its clients – **CENTRICA Business Solutions Energy Assets**, an international energy services and solutions company and a leader in the new world of distributed energy – Artemys is looking for a **Project Manager – Large Battery Projects**, who will hold project management responsibility for the delivery of large utility-scale power generation assets, including large scale battery projects.

Location: **Antwerp**

(Flexible hybrid working agenda: 1-2 days a week in the office + 3 days from home)

Responsibilities

CENTRICA Business Solutions Energy Assets helps organisations to balance the demands of the planet and profit. Centrica is now investing in clean energy assets and large battery projects with the ultimate goal of substantially increasing the capacity of flexible energy to at least 600 MW in Europe in the short term.

As a **Project Manager – Large Battery Projects**, you will actively contribute to Centrica's energy transition and net zero growth strategy. You will report to the Head of Energy Assets Europe, and your focus will be on clean assets – you will help the transmission network in becoming more stable thanks to the integration of flexible energy sources.

Your key task will be to manage a portfolio of large-scale energy assets and power generation projects in different locations, during the development phase, and into the execution phase.

As a **Project Manager – Large Battery Projects**, you will be **accountable** for:

- Managing large battery development and investment projects – during the development phase, and into the execution phase – in accordance with **FIDIC** standards and operating procedures
- Managing individual project budgets
- Managing project risk, programme, costing, preliminary design, planning, and consent applications
- Carrying out engineering feasibility and preliminary design operations – so as to create design proposals that will enable reliable planning and pricing
- Managing project costs – making cost estimates using various methods and techniques, defining a risk timeframe and risk register, and providing appropriate backup plans
- Providing support in the selection of contract partners, especially external suppliers who will be engaged for the execution of various project aspects (environmental aspects, EPC contracts, etc.)
- Providing support in contract management activities, especially the activities of external suppliers
- Establishing and maintaining solid and engaging relationships with landowners, internal and external stakeholders
- Project planning, execution, monitoring, and control; ensuring smooth project

Hiring organization

Centrica Business Solutions

Employment Type
